PROFESSIONAL SUMMARY

Software & QA Automation Engineer with a background in full-stack development and quality engineering. Proven experience in building AI-driven tools (RAG) and interactive web applications. Dedicated to enhancing the consumer experience by delivering well-tested, user-centric software.

PROFESSIONAL EXPERIENCE

Software Developer

SKS Engineering - November 2025 - Present

In this role, I was contracted by SKS Engineering to build a custom GIS application.

- Designed and developed an interactive Image Map software to enhance clients' ability to view and navigate floor plans.
- Collaborated with vendors to install and configure the application in office environments, ensuring smooth deployment.
- Maintained and improved the application to implement new features and resolve bugs.

Information Technology

City of Anderson - August 2025 - April 2026

During this internship, I assisted the IT team by developing and testing in-house tools, performing help desk and system administration duties.

- Built a RAG model to improve document search and information retrieval for staff.
- Provisioned, configured, and maintained virtual machines supporting departmental operations.
- Stood up and maintained Apache web server to ensure reliable operation of departmental web applications and scripts.
- Assisted the IT team by developing and testing internal tools and supporting system administration operations.

Software Quality Assurance Engineer

Karmak - May 2024 - August 2024

As an intern with Karmak, I was highly involved with testing the flagship product as well as the mobile app. I also created end-to-end tests for the mobile app.

- Researched and evaluated Detox integration to modernize and strengthen mobile testing processes for the development team.
- Performed manual testing on web and mobile applications to identify defects and improve software reliability.
- Collaborated with cross-functional teams in an Agile development environment throughout the software lifecycle.

Software Engineer in Test

Genesys - June 2023 - August 2023

As an intern with Genesys, I created automated UI and API tests with Selenium and used Jenkins for CI/CD.

- Implemented CI workflows using Jenkins and Bitbucket, improving automation consistency and reducing deployment times.
- Developed automated API and UI tests and supported CI/CD workflows using Jenkins and Groovy scripting.
- Collaborated with software engineers to test and validate new application features prior to release.

EDUCATION

B.S Computer Science Cum Laude

Anderson University

SKILLS

- **Programming:** JavaScript, Python, Angular, and SQL.
- **QA & CI/CD:** Git, Jenkins, Azure DevOps, Selenium, and Playwright
- **Soft Skills:** Agile, Pair Programming, and Collaborator
