SKILLS

Programming Languages: TypeScript, Python, Java
Database & Data Management: Microsoft SQL Server
Version Control & DevOps: Git, Bitbucket
Web Framework: Angular

CI/CD Tools: Jenkins, Azure DevOps Pipelines
Software Testing: TestNG, Selenium, Playwright
Soft Skills: Leadership, Customer Service, Public Speaking, Teamwork, Collaborator

EXPERIENCE

Information Technology Intern

Anderson, IN

IT Intern at City of Anderson

August 2024 -Present

- Developed an internal task management system for the IT department using Python with HTML, CSS, and JavaScript, improving workflow visibility and efficiency.
- Performed research and analysis on options for migrating network monitoring services to more scalable solutions.
- Stood up and maintained Apache web server to ensure reliable operation of departmental web applications and scripts
- Built a Retrieval-Augmented Generation (RAG) model to streamline document search and retrieval, enabling staff to access information more efficiently.

Quality Assurance Intern

Carlinville, IL

Quality Assurance Intern at Karmak

May 2024 – August 2024

- Researched and evaluated Detox integration to modernize and strengthen mobile testing processes for the development team.
- Conducted comprehensive manual testing across enterprise-level web and mobile applications, identifying defects and improving product reliability.
- Participated in SCRUM ceremonies and contributed to an agile SDLC environment, collaborating with developers, testers, and product owners.

Software Engineer Intern

Indianapolis, IN

Quality Assurance Software Engineer at Genesys

June 2023 - August 2023

- Implemented CI workflows using Jenkins and Bitbucket, improving automation consistency and reducing deployment times.
- Developed automated API and UI test suites in Java and designed Jenkins pipelines using Groovy scripting to support continuous delivery.
- Collaborated with software engineers to test and validate new application features prior to release.

PROJECTS

Ecom – Web Application

Java | Spring | Relational DB | Angular

Summer 2025

- Built and deployed a full stack web application using the Angular web framework
- Implemented RESTful communication with my custom made API using Spring
- Handled all database action with my relational database and using Java's ORM, JRE

Social Media – Web Application

Java | Spring | HTML | JS | CSS

Summer 2025

- Built a RESTful API using Java's Spring library which also supported the relational SQL database
- Implemented API and UI tests using Selenium to ensure project followed Test Driven Development

AWARDS AND ACCOMPLISHMENTS

Eagle Rank in BSA

2021

EDUCATION

Anderson University – B.S Computer Science Cum Laude

GPA: 3.7/4.0
