

Marcus Shaffer

shaffemarcus@gmail.com | marcus-shaffer.com

SKILLS

Programming Languages: TypeScript, Python, Java
Database & Data Management: Microsoft SQL Server, SQL,
Version Control & DevOps: Git, Bitbucket

Web Framework: Angular, Flask
CI/CD Tools: Jenkins, Azure DevOps Pipelines
Software Testing: TestNG, Selenium, Playwright
Soft Skills: Leadership, Agile, Teamwork, Collaborator, Pair Programmer

EXPERIENCE

Software Engineer

SKS Engineering (Contract)

November 2025 - Present

- Designed and developed an interactive Image Map software to enhance clients' ability to view and navigate floor plans.
- Collaborated with vendors to install and configure the application in office environments, ensuring smooth deployment.
- Maintained and improved the application to implement new features and resolve bugs.

Information Technology

City of Anderson (Internship)

August 2025 - April 2026

- Developed an internal task management system for the IT department using Python with HTML, CSS, and JavaScript, improving workflow visibility and efficiency.
- Performed system administration duties, including provisioning, configuring, and maintaining virtual machines to support departmental operations.
- Stood up and maintained Apache web server to ensure reliable operation of departmental web applications and scripts.
- Built a Retrieval-Augmented Generation (RAG) model to streamline document search and retrieval, enabling staff to access information more efficiently.

Quality Assurance Engineer

Karmak (Internship)

May 2024 - August 2024

- Researched and evaluated Detox integration to modernize and strengthen mobile testing processes for the development team.
- Conducted comprehensive manual testing across enterprise-level web and mobile applications, identifying defects and improving product reliability.
- Participated in SCRUM ceremonies and contributed to an agile SDLC environment, collaborating with developers, testers, and product owners.

Software Test Engineer

Genesys (Internship)

June 2023 - August 2023

- Implemented CI workflows using Jenkins and Bitbucket, improving automation consistency and reducing deployment times.
- Developed automated API and UI test suites in Java and designed Jenkins pipelines using Groovy scripting to support continuous delivery.
- Collaborated with software engineers to test and validate new application features prior to release.

PROJECTS

CyberNotes – Web Application

Python | Flask | HTML | JS | CSS

- Built a RESTful API using Python's Flask library to support model inference for retrieval augmented generation (RAG).
- Implemented build scripts to re-vectorize newly added files and streamline deployment on an Apache web server.

EDUCATION

Anderson University – B.S Computer Science Cum Laude
